# CARPET BEETLE PEST CONTROL

HOW TO GET RID OF CARPET BEETLES IN UK?

## FIRST STEP - REMOVE ALL EGGS

The first measure is to remove the beetle's eggs and larva to decrease the growth of adults.

## SECOND STEP - VACUUMING

The next step is vacuuming the areas affected by the beetles including carpets, rugs, and furniture.

## THIRD STEP - STEAM CLEANING

The third step is steam cleaning. Here you're going to clean the same area you vacuumed with a steam cleaner.

## FOURTH STEP - LAUNDRY

The next step is to put all your clothing and pillows to the laundering service.

## FIFTH STEP - WIPING

The last step is wiping the entire surface with vinegar. It helps kill the carpet beetles.
